

# Plug-In Partner Commitment Form

## We want to become a Plug-In Partner.

We urge automakers to go beyond popular hybrid vehicles and produce plug-in electric hybrids that run on electric fuel as well as gasoline or biofuels. Plug-in hybrids will improve air quality, lower fuel costs and reduce dependence on imported oil.

By signing below, \_\_\_\_\_ [*Entity/Company Name*] voices its support for the commercial production and promotion of flexible-fuel plug-in hybrid vehicles (PHEVs).

By joining the Plug-in Partners National PHEV Initiative as a **Plug-In Partner**, we agree to the following:

- To allow our entity/organization to be listed as an official Plug-In Partner;
- To write and publish one or more news releases, articles, op eds, etc., about the Plug-in Partner National Campaign and the benefits of the initiative, including a reference to [www.pluginpartners.org](http://www.pluginpartners.org);
- To add a link to [www.pluginpartners.org](http://www.pluginpartners.org) to our Web site's homepage to help spread the news of the Plug-In Partners Initiative (if organization has a Web site).
